Triple28™

**Triple28™ is the triple-glazed unit that
changes everything — and nothing.
Three panes of advanced glass in a 28mm
profile that fits straight into existing
frames. More thermal performance.
More acoustic comfort. More UV protection.
Less weight, less hassle, less compromise.**

It's triple glazing, finally made simple.

MORE PANE MORE PEACE

Enjoy a peaceful home with our quietest sealed glass unit yet.

Triple28's™ Monolithic Glass Core significantly reduces outside noise transference compared to traditional double glazing.

MORE PANE LESS UV

Shield your furnishings and family from 99% more harmful UV rays.

Triple28's™ advanced laminated option blocks up to 99% of UV rays compared to traditional double glazing – protecting furnishings, reducing fade and creating a healthier indoor environment.

MORE PANE MORE COZY

**Enjoy year-round
comfort with
warmer winters and
cooler summers.**

With Triple28's™ Single Seal Technology, your home will see reduced heat loss in the winter and cooler temperatures in the summer – delivering exceptional year round comfort.

MORE PANE MORE SAVINGS

**Our best-ever
performing
sealed
glass unit.**

Triple28™ ArgonLock Technology gives our best ever insulation (U-Value) performance. This combination achieves an industry leading 0.8 U-Value for maximum thermal performance.

WHY CHOOSE

Triple28TM

50% more thermally efficient than traditional double glazing.

Our best-ever performing 0.8 U-Value sealed glass unit.

At 33dB it's our quietest sealed glass unit ever.

Shields your home furnishings from up to 99% of UV rays.

Uses 100% recyclable glass.
